Agricultural Zone Restriction

You may not drive an ATV within the right-of-way (ditch) of a state or county road from April 1 to August 1 in the agricultural zone. This does not apply to grant-in-aid trails or to Class 1 ATVs registered and used exclusively for agricultural purposes. Class 2 ATVs cannot be operated in ditches. See Class 2 ATV operating exceptions August 1 to April 1 (page 32).

The Minnesota agricultural zone is the area lying south and west of a line formed by the following highway rights-of-way: starting at the North Dakota border, the line goes east along U.S. Highway 10 to State Highway 23, then follows Highway 23 east to State Highway 95 to the Wisconsin border. The agricultural zone does not include the rights-of-way of these boundary highways, and applies only to Class 1 ATV use.
